1. Product Instruction

MK116 is an ESP32 WIFI smart plug with **energy monitoring**, which can track your device's real-time power and energy consumption with **$\pm 0.5\%$ measuring accuracy**.

The plug is built-in ESP32 module to realizes WIFI communication. It can access to multiple servers such as MQTT broker, Ali IOT, AWS IOT, also can connect to your own servers. Users can easily manage your electrical device from the cloud server or APP client.

1.1 Key Features

- Built-in ESP32 module and MOKO standard firmware
- Control from anywhere
- Timer control
- High accuracy power/energy reading
- Analyze real-time and historical consumption
- Detect if electrical device load is connected to it
- Overload protection to improve safety
- Multi-color LED codes device state and consumption
- Firmware update over the air (OTA)
- Supports Android & IOS APP SDK for APP developing
- Schematic diagrams are available for customers to develop firmware
- Australian approval standard: AS/NZS 3112:2017; AS/NZS 3122:2015; AS/NZS 3100:2017; AS/NZS CISPR 32:2015; AS/NZS4268:2017; AS/NZS2772.2

1.2 Applications

- Household appliance control
- Smart home/office energy monitoring
- Industrial electrical devices control
- Smart charging pile
- Energy management

2. Physical Characteristics

NO.	Item	Remarks
1	Wireless technology	WIFI
2	Input voltage	100VAC-240VAC, 50/60HZ
3	Output voltage	100VAC-240VAC
4	Max load	10A, 2400W, continuous load
5	Operation temperature	0 °C~ 40 °C (32°F ~ 104°F)
6	Plug type	Type I
7	Certification	SAA&RCM

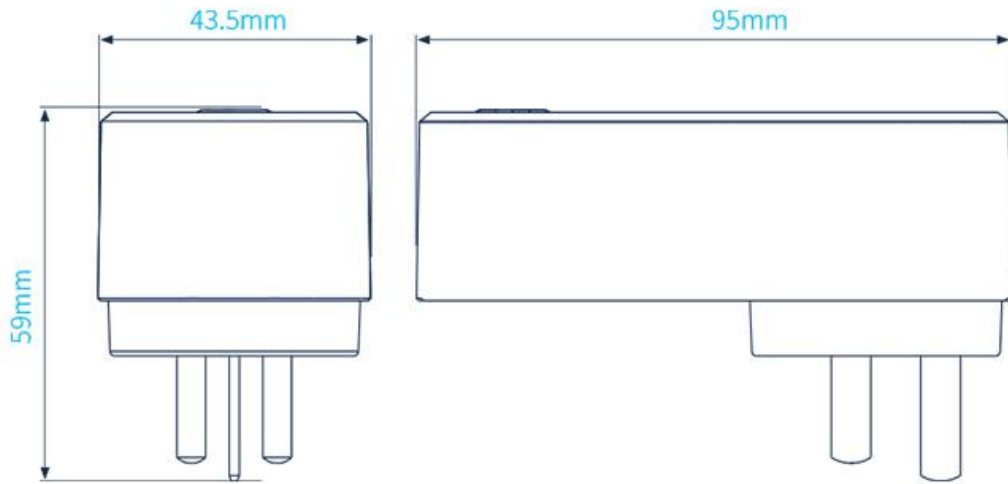

3. Technology Parameters

NO.	Item	Remarks
Hardware	MCU	ESP32
	Energy metering chip	RN8209C
Software	Communication protocol	MQTT V3.1.1
	Firmware upgrade mode	OTA
	User configuration	MokolifeX APP supports Android& IOS
WIFI specification	Frequency	2.4GHz-2.5GHz (2400MHz-2483.5MHz)
	WIFI protocol	802.11b/g/n
	Encryption mode	OPEN/WEP/WPA_PSK/WPA2_PSK/WPA_WPA2_PSK
	Coverage	100m in open space
	Transmission power	13dB@11n; 18.5dB@11b

4. Indicator & Button Status

Items	Indicator status	Operation	Remark
Turn on	Solid yellow	Not connect to server and short press the button to switch ON	Low power mode
	Solid White/Blue/Cyan /Green/Yellow/Orange /Red/Purple	Connected to server and short press the button to switch ON	LED color can be selected through APP
SoftAP mode	Flash amber	Plug works as a hotspot, APP can connect to it	
Network Connection /OTA upgrading	Flash blue	Device is connecting to router and server/OTA updating	
OTA failed	Flash yellow	To indicate OTA result	
OTA successful	Solid Blue	To indicate OTA result	
Overload protection	Flash yellow and blue alternately	When the connected load exceeds the overload value set through APP, device will cut off automatically	
Disable/Enable the power indicator	Keep purple 2S	Press and hold the button, until LED turns purple , release the button, then immediately click it again	1st menu position
Reset energy consumption	Keep green 2S	Press and hold the button, until LED turns green , release the button, then immediately click it again	2nd menu position
Factory reset	Keep red 2S	Press and hold the button, until LED turns red , release the button, then immediately click it again	3rd menu position
Disable/Enable the power indicator successfully	Triple white blinking		
Reset energy consumption	Triple red blinking		
Factory reset successful	Flash yellow and blue alternately once		Then device enters softAP mode
Switch ON when the power indicator disabled	Triple purple blinking	When the power indicator disabled, turn ON the switch	

5. Dimensions

Dimensions (Length x Width x Height):
95mm x 43.5mm x 59mm

6. Additional Assistance

Any other question, please contact our sales team for further assistance:

MOKO TECHNOLOGY LTD.

Website: www.mokosmart.com

Email: sales@mokosmart.com

Phone: 86-755-23573370

Address: 4F, Building2, Guanghui Technology Park, MinQing Rd, Longhua, Shenzhen, Guangdong, China

7.Revision History

Revision	Description	Editor	Date
V1.0	Initial Release	Weiguifen	2020.10.21
